

Doctora Clown is operating in Colombia since 1998

Doctora Clown has become an important part of daily routine in several hospitals. The humour and joy Doctora Clown generates are vital components of the hospitals' activities. Doctora Clown's visits have a special status and are of greatest value as they have a special effect on the children and are of tremendous importance contributing towards faster mental and physical healing.

Humour and medicine compliment each other in favour of child welfare. The sponsor association „Fundación Doctora Clown“ wants to help build and support a Colombian network.

Your donation or monthly contribution will enable Doctora Clown make weekly visits to the children giving them love and hope.

Our sincerest and heartiest thanks!
